RODENT BAIT FOR CONTROL OF WOODRATS  
(*Neotma spp.*) ALSO KNOWN AS PACKRATS

**NM SLN No. NM-120001**

**EPA REG. NO. 12455-79**

SLN Label Expiration Date: December 31, 2019

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. All applicable directions, restrictions and precautions on the EPA registered label are to be followed. This labeling and the EPA registered label must be in the possession of the user at the time of pesticide application.

**Use Restrictions:** For the control of wood rats (pack rats) in and around man-made structures. Predatory and scavenging birds and mammals may feed upon dead or dying woodrats (pack rats). These animals are then subject to secondary poisoning. Raptors are extremely susceptible.

If protected birds are poisoned, the applicator may be in violation of the Migratory Bird Treaty Act, Bald and Golden Eagle Protection Act, or the Endangered Species Act. Secondary poisonings can be avoided or minimized by adhering to label directions.

**CROP/SITE:** This product may only be used to control woodrats (pack rats) around man-made structures. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port of terminal buildings and related structures around and associated with these sites.

**APPLICATION DIRECTIONS:** Follow label directions for rats on the EPA registered label. Do not apply further than 100 feet from a man-made structure. Applicators must regularly check for woodrat (pack rat) carcasses and using waterproof gloves collect, seal in a plastic bag, and dispose of in trash. Any bird or other mammal carcass besides rats and other rodents that are found, must be collected, held and reported to the New Mexico Department of Agriculture at 575-646-2220. Using waterproof gloves, any bird or other mammal carcasses should be double bagged and frozen. The New Mexico Department of Agriculture will direct you to what to do with the non-target animal carcass.
