

# Aero-Tech® Advanced Fogging System

## Why Aero-Tech® Advanced Fogging System?

The Aero-Tech® Advanced Fogging System allows for remote application and efficacious and economical distribution of fogging products. Two key benefits are reduced downtime and improved coverage. The Aero-Tech® Advanced Fogging Systems is expandable and designed for minimal maintenance, while still providing effective performance.

## The Top 3 Benefits of the Aero-Tech® Advanced Fogging System:

### 1 Remote Application

The AeroTech® Fogging System is a permanently installed system with a five-year warranty. The system utilizes remote application which means no personnel are required inside the treatment area during application. Compared to hand fogging, **the system dispenses fogging material quickly and evenly resulting in less downtime.**

### 2 Efficacy

Directional and omni-directional nozzle systems are mounted at ceiling height and overhead allowing **wide coverage and improved contact time.** Strategically placed throughout the structure, the system can deliver fogging material at high pressure for advantageous primary and secondary atomization.

### 3 Flexibility

There is a wide range of fogging products to support IPM programs and pest prevention including Pyrethrin formulations, Insect Growth Regulators (IGR), and Vap20 Vapona (a highly effective option). IFC Advanced Fogging experts design and install the Aero-Tech Fogging System to **meet the unique requirements of your facility** and the demands of the IPM program.

**Contact IFC today to bring the Aero-Tech® Fogging System to your business.**
